
Biscayne Bay Culverts

Construction – Water Control Structures

Project Location: Biscayne Bay, Florida

Underwater Engineering Services, Inc. (UESI) installed eight headwalls with manatee screens and flap gates and 200 linear feet of 36-inch-diameter corrugated aluminum pipe at the Biscayne Bay Coastal Wetlands Phase 1: L-31 Culverts. UESI meet all permit requirements working in the Biscayne Bay / Mangrove Habitat. The project was completed safely, ahead of schedule and with no change orders. The work was part of the Everglades Restoration Project.

Completion Date: April 2010

UESI Job Number: COM2009254
