Pipe Salvage and Recovery

Client/Owner: Cashman Dredging & Marine Contracting Co., LLC
Project Location: Jupiter, Florida

UESI provided certified commercial dive services and marine support for the off shore recovery of and salvage approximately 1200lf of 24" diameter dredge pipe. UESI divers utilized burning tools to cut the pipe into sections, rig each section, and pull the pipe sections off the bottom of the ocean floor. All the recovery was performed safely and all dive operations were performed in accordance to OSHA, US Coast Guard and ADCI diving and safety standards.

Completion Date: May 2014
